Comments by the CEO

During the fourth quarter, market demand and customer investment activity continued to be impacted by the COVID-19 pandemic. While we saw good development within Alimak Group in October, the renewed lockdowns in November and December put pressure on order intake and revenue. Organic order intake was down by 14%, driven down by the continuing delay in investment decisions within our General Industry and BMU business. However, the underlying sales pipeline remains fairly strong and we continue to see very few project cancellations. Positive in the quarter was that Construction Equipment and After Sales both showed organic growth in order intake, with 8% and 6% respectively. Group revenue in the quarter was down by 11% organically, driven down by the lower order intake earlier in the year and some delays in project execution stemming from effects of the pandemic, with lower revenue in all business areas year on year.

With the continued challenging market situation during the fourth quarter, we have kept our focus on measures to safeguard profitability. I am pleased to see that the efficiency measures we have executed so far have further strengthened our underlying profitability and that we were able to deliver an adjusted EBITA-margin of 13.7% for the quarter as well as strong cash flow. The cost reductions we announced in October have been implemented as planned and we are well on track to deliver on the MSEK 60 targeted annual savings with full effect as of H2 2021.

Establishing the base for profitable growth

As of January 1, our new decentralised, customer focused organisation is in place and forms the base of efficient execution of our three-step New Heights programme and we are in the midst of developing the divisional strategies. An example of our accelerated efforts in R&D and digitalisation as well as in product- and service development is the recently launched a new construction hoist for the Chinese market designed for

use inside elevator shafts. Further, our BIM Gallery has reached more than 1,000 downloads, proving the market’s need of digital representations of our product offering to improve the planning process of construction projects.

Set for margin improvements during 2021

We expect to see an improved business climate in the coming year, though the first half of 2021 will most likely continue to be challenging but we are prepared to manage different scenarios. We have completed step one in our New Heights programme, establishing the base, and will continue according to plan with step two; to secure margin improvements. 2021 will be a year where our main focus will be on delivering on our profit commitments while at the same time preparing the Group for phase three of the New Heights program; sustainable profitable growth in the years to come.

I want to take this opportunity to thank each and every one of our employees for adapting to the challenges during the year, for their commitment and for taking ownership to minimise the spread of the virus as well as the impact on each other, our customers and business. I am very happy and proud to have been given this opportunity to lead the Group and its amazing people. I see a lot of potential to realise going forward.

Ole Kristian Jødahl, President and CEO

Construction Equipment

Share of revenue

Share of EBITA adj.

Order intake remained flat at MSEK 130 (129) but increased 8% organically and was an improvement from Q3. Customers still show hesitation for capex investments and make decisions based on current project activity and confidence in the market especially in Americas. One exception was the large order from Morrow Equipment in the US for 36 construction hoists in December.

Revenue decreased by 38%, down 32% organically, to MSEK 126 (204), which still represents a sequential improvement from Q3 2020. The decrease primarily comes from the low backlog.

EBITA adj. was MSEK 14 (31), corresponding to a margin of 10.8% (15.4). The decrease was the result of the lower volumes and low factory utilisation as well as unfavourable geographical mix with lower deliveries to Americas. This was somewhat mitigated by cost reductions.

The biggest drop came from the BMU business unit, with delays in contract signing though stable sequentially compared to previous quarters in 2020. General industry continued to experience delayed customer decisions, especially towards the end of the quarter.

Revenue decreased by 18%, down 10% organically, to MSEK 422 (517), the result of delayed shipments for General Industry, delayed project starts for BMU and lower backlog for Wind.
